

Phoenixsiv

Whitepaper v 2.0

Introduction

Phoenixsiv is a **Cryptoasset** created in conjunction with several teams from different countries, whose main function is that the holders of **Phoenixsiv (PSIV)** can reduce costs in commissions for transactions made within the platform and its partners, as well as when making withdrawals from it in Exchange. It also offers community users the possibility of earning profits by being exchanged with the main crypto-asset pairs in the market. It is important to keep in mind that an Exchange itself does not buy or sell the Cryptoassets when exchanges are made; on the contrary, what the Exchange does is to compare the price of the user who sells with the user who is willing to buy his asset at the price he requests. This connection between buy and sell orders is a key function in driving the price of **PSIV**.

Phoenixsiv offers a fast and secure shipping service thanks to its programming based on the script algorithm. This makes it a profitable cryptoasset in the future, the pre-mining that exceeds 50% of the total maximum coins that may be issued was done to avoid the birth of whales via mining, which help to stop the blockchain by abandoning mining if it ceases to be profitable for them avoiding a drop in transactions or total blocking of the chain, thus positioning itself as an opportunity for innovation and growth for many investors in the crypto ecosystem.

Presale

Phoenixsiv will be offered to the public through a presale divided into 4 stages:

In our first stage that lasts from March 30, 2021 until April 19 the cost to buy PSIV on our portal via coinpayments is 12 cents.

The second stage starts on April 20 and ends on May 10, 2021, in this stage the cost of the coin increases to 25 cents.

In our third pre-sale stage, the cost increases to 35 cents, starting on May 11 and ending on May 31.

And the last pre-sale stage goes from June 1st to June 21st of the same month, as the final pre-sale price is set at 50 cents.

Technical characteristics:

Name: PHOENIXSIV.

Acronym: PSIV.

Maximum number of coins: 17'567.000.

Pre mined: 13'967.000.

Block reward: 6.

Halving: Every 300'000 blocks.

Time between blocks: 120 seconds.

Confirmations needed: 3 blocks.

Time to increase in difficulty: 10 minutes.

Roadmap

Wallet

Before its launch Phoenixsiv will have its own Wallet or virtual wallet for its users to store their crypto funds. Users will be able to trade with the lowest fees in the market.

Exchange

Phoenixsiv will be listed on at least two exchanges, where it can be exchanged for other crypto-assets or held, since its price will gradually increase as users use it in different projects and businesses.

As it has more market acceptance and consistent usability it will be listed on other larger exchanges to cover the crypto market globally generating trust and ranking.

As it is well known the biggest factor that determines the growth of a cryptoasset is supply and demand, we will take Phoenixsiv to the whole world making it one of the most used, allowing anyone to use it, reaching communities that can benefit from our Cryptoasset.

A Cryptoasset for Women

Phoenixsiv is a Cryptoasset that aims to reach the largest number of users who represent the female gender in the world, women.

Women who have to assume in society the role of any human being, because they are capable of thinking, discerning and deciding about circumstances of social importance and transcendence.

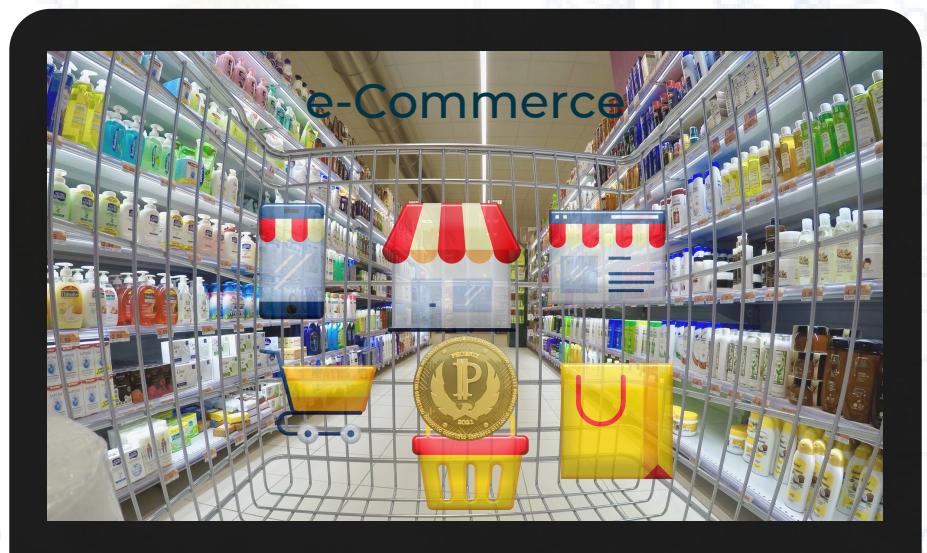

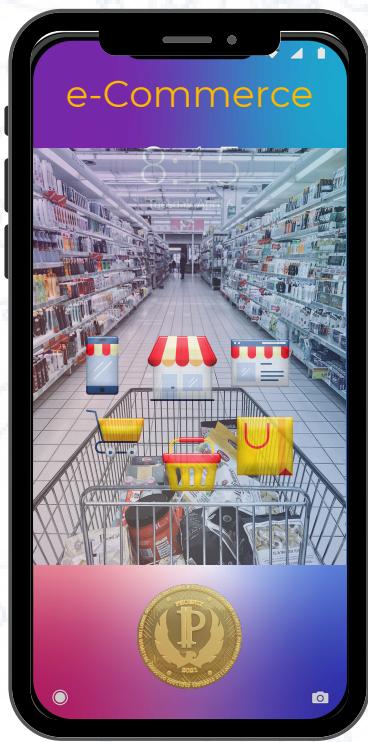

Phoenixsiv represents banked and unbanked women, those that the social system has prevented them from advancing financially, those that in this era of liberation and the importance of the role of women in society, have the ability to rise from the ashes like the Phoenix Bird.

Online Store

Phoenixsiv users will be able to purchase different products and services through the virtual store, thus providing usability and creating a win-win ecosystem, where users will be able to offer their products or services, as well as buy what they want by paying with PSIV.

Phoenixsiv Users will be able to have their own virtual commercial establishment, thus generating income from sales and also by holding PSIV gaining value.

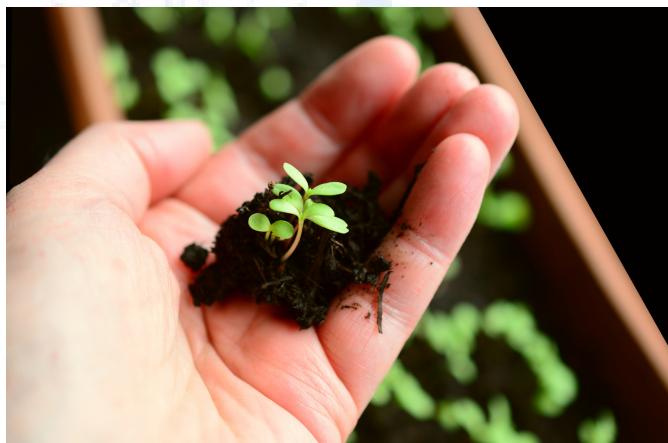

Socio-Environmental Labor

"Phoenixsiv is a cryptoasset that has as its principle the protection of forests and recovery of water sources, contributing to the recovery, conservation and preservation of the environment through members and users holders of Phoenixsiv who lead different NGOs and especially to the Phoenixsiv foundation.

In defense of this principle, Phoenixsiv plans to carry out reforestation work for 5 years with the annual planting of 20,000 trees, thus reaching a total of 100,000 trees planted, which will be strategically located in different areas where reforestation is essential for the recovery of the environment.

Likewise, to generate social inclusion starting from the education of tomorrow's children to finally obtain a sustainable and ecological socio-environmental transformation with global impact".

For every PhoenixSiv that a person buys, he or she will be contributing to the purchase of forests throughout Latin America, because a percentage goes to the environmental social project.

Legal considerations

The contents of this whitepaper are for informational purposes only and should not be construed as legal, tax, investment, financial or other advice or material. Nothing contained on our website or in this whitepaper constitutes a solicitation, recommendation, endorsement or offer by our teams or any service provider to buy or sell **PSIV (PHOENIXSIV)** where the solicitation or offer would be unlawful under the securities laws of such jurisdiction, or nation.

The entire contents of this whitepaper are general information and do not address the circumstances of any particular individual or entity. This whitepaper does not constitute professional and/or financial advice, nor does any information in it constitute a complete or incomplete statement of the matters discussed or of the law relating thereto. You assume sole responsibility for evaluating the merits and risks associated with the use of any information or other content in this whitepaper before making any decisions of any kind. Neither **Phoenixsiv** nor its users, nor any third party service provider is liable for any potential claims for damages arising from any decisions you make based on the information contained in this whitepaper or on the Cryptoasset website.

It is recalled that the risks associated with investing in Cryptoassets and other market instruments constitute risks of loss. Loss of principal is possible. Some high-risk investments may use leverage, which will accentuate gains and losses. Past performance of an investment, Cryptoasset or token is not a guarantee or predictor of future investment performance.

No regulatory authority has reviewed or approved any of the information set forth herein, no such action has been taken in accordance with the laws, requirements or regulations of any jurisdiction. **PHOENIXSIV**, its users and their respective officers, employees or agents, the **PHOENIXSIV** cryptoasset (**PSIV**), products and services provided by its allies, shall not be liable for damages of any kind, including but not limited to direct, incidental, special or indirect damages (including, without limitation, loss of profits, loss of revenue or loss of income of third parties, whether foreseeable or not, commercial losses or damages resulting from the use of the information contained in this whitepaper, the project integrator team disclaims any liability for any direct or indirect loss or damage of any kind arising directly or indirectly from:

1. Reliance on any information contained in this document.
2. Any error, omission or inaccuracy in the information given in the whitepaper.
3. Any action resulting from the management of markets in Exchange.
4. Use or acquisition of the **PHOENIXSIV** Cryptoasset not knowing the basic terms of Cryptoassets.

You confirm and agree that you are not acquiring the PSIV cryptoasset (**PHOENIXSIV**) for speculative, immediate resale or other financial purposes.

There are or will be important factors that could cause The actual results of **PHOENIXSIV** to differ materially from those indicated in these statements. These factors include, but are not limited to, those described in this whitepaper.

PHOENIXSIV makes no promises about the return on investment or future market value of the Cryptoasset, no promise of value, exchange pricing, promise of future profits and no guarantee of any kind that the PSIV Cryptoasset can be valued at a specific price. Unless those interested in PSIV satisfactorily understand its purpose as a Cryptoasset, its technology, and understand the volatility and risks of the market in which it is traded and fully accept it, they should not participate in PSIV.

Currently, regulations with respect to Cryptoassets sales events are not fully or partially implemented. Therefore, it can be expected in the medium term that governmental bodies will make restrictive decisions to prohibit, regulate or tax income from the sales of Cryptoassets. This could result in restrictions on obtaining, owning and trading Cryptoassets and could adversely affect our stakeholders in a way that we cannot predict. This whitepaper being for informational purposes only may be subject to change.
